from state to state. Some states allow no alcohol imports while others require the importer to obtain a permit and pay a fee and still others allow a reasonable amount. Each state has regulations and must be consulted before making a shipment.

- A detailed inventory must be made at the time of packing in-order for food and drug filings to be performed and proper duties and taxes to be paid on the shipment.
- Weapons:
  - Guns (ammunition should not be shipped as it is a hazardous good)
- Fish / Wildlife:
  - Ivory items, skins, feathers and shells are regulated by Fish and Wildlife.
  - Many of these items require special CITES Permits or may be prohibited from being exported.
  - It is critical for the origin agent to consult with the USA agent to determine if an item requires a permit or can be legally exported. The permits cannot be issued once the shipment has left the origin.
  - The destination agent will need to know the common, scientific names and country of origin to determine if a permit is required.
- Food Items:
  - It is better not to ship food items.
  - Food products also require a detailed inventory for food and drug filings and duty payment.
